

## Short Biography

Dr Praveen Peddu

MBBS, MRCS, FRCR

**Dr. Praveen Peddu** is a Consultant Radiologist at King's College Hospital, London, and a leading authority in interventional oncology and radiology. Initially trained as a surgeon, he earned his MRCS from the Royal College of Surgeons in Edinburgh before specializing in radiology through the London Deanery. He further refined his expertise in Hepatobiliary Intervention with fellowship training at King's College Hospital.

Appointed as a Consultant Radiologist in 2008, Dr. Peddu served as the **Clinical Lead for Liver Imaging** from 2017 to 2022, during which he introduced several innovative procedures, including same-day SIRT treatments and radial access interventions. Under his leadership, King's College Hospital became a hub for advanced procedures, and he also launched masterclasses in Radioembolisation and Nanoknife technologies.

A pioneer in interventional oncology, Dr. Peddu introduced the use of nanoknife technology to the NHS in 2014 and is a leading expert in percutaneous liver ablation. With over 30 peer-reviewed publications and textbook chapters, he has presented his work at leading European and North American conferences.

In addition to his clinical roles, Dr. Peddu is an active member of the scientific programming committees for **IOUK** and the **SPECTRUM Conference**. He is the incoming **Chair of Interventional Oncology UK**, continuing to shape the future of liver imaging and oncology treatments.
